**myRichTexts released!**

MOApp Software Manufactory has crafted and just launched a new software program on the market: myRichTexts.

Whatever you need to write, myRichTexts offers an intuitive way to just focus on writing without to worry about your documents, text files, backups, or how to regain them — myRichTexts takes care of it all for you! All of this is done in a self-explanatory and user-friendly way. myRichTexts saves your documents in the background and creates a backup at every start-up if you wish.

All of your documents are just one click away at the left-hand side menu and are completely searchable. For your convenience, myRichTexts allows you to add tags to your documents, which, in turn, can be added to your Spotlight searches and grouped into 'Smart Folders' as well; thus, you will never again lose or misplace another text document.

Best of all — you can easily sync all your documents/entries/writings across multiple Macs. myRichTexts supports iDisk/Dropbox sync, will automatically save and backup all your documents/entries in the background and even supports the use of OpenMeta tags.

Self-evident that myRichTexts offers all comforts you know from other mature word-processors like rich text formatting, word- and character count, statistics, fullscreen, customizable defaults and even printouts with footer...

You can test myRichTexts out in the demo version without any limitations by clicking on [www.myownapp.com](http://www.myownapp.com). myRichTexts is available at a reasonable price of 16 EURO. myRichTexts is compatible with the Mac OS X 10.5.8 or higher.
