**Schreiben released!**

MOApp Software Manufactory  
has crafted and just launched a new software program on the market: Schreiben.

**The lean word processor for the rest of us!**

Most of us don't need Word.  
They want something more beautiful and easier-to-use than TextEdit  
without paying the price for an overloaded program with a mysterious look-and-feel.

Schreiben (German for the act of writing or a letter) focuses especially on this  
and comes with some elaborate functions. This includes automatic saving and back-ups,  
customizable header and footer, writing in full-screen-mode, continuous display and image  
scaling, a live- word-count, the support for system-wide OpenMeta tags  
and easy-to-include snippets for recurring text-elements.

Self-evident Schreiben supports all kinds of Rich-Text-formatting and all major file-formats.  
Most important it's super fast, stable and intuitive to use.

Key features

- Page layout
- Word count
- Statistics
- Continuous display
- Image scaling
- Auto-save
- Date-stamped backups
- Selection of text by style
- Floating window
