

## First Steps

- set zoom for textview
- set margins for textview (screen)
- set default folder for documents (in Preferences)
  - > all new/imported documents will be automatically saved there
  - ! opened documents will be saved at their original path
- set auto-save interval
- set defaults for application startup (center window etc.)
  
- create new document
  - > name it (title)
  - > enable 'wrap to page' (if needed)

?! documents will be automatically saved in background

## Support

I love to create small, focused and easy-to-use software.  
This includes extensive, friendly, and (most of all) quick support.  
If you have any questions, wishes, suggestions  
or otherwise unspecified comments/requirements, feel free to contact me.

- Every application comes with a feedback tool included.  
Access it by using Menu > Help > Provide Feedback.
  
- Please send your emails to [info@myownapp.com](mailto:info@myownapp.com)
- Or use the contact form at my website: <http://www.myownapp.com>
- Or twitter me: <http://www.twitter.com/moapp>
